

## Lifting Magnet - Walker Lifting Magnet Accessory

### Product information

Very convenient for loading and unloading of horizontal machine centres and lathes  
Magnet is adjustable to suit a range of diameters and widths  
Lifting arm can be retrofitted to existing NEO magnets  
The advantages of magnetic handling  
Considerable savings in time and money  
One man operation  
More effective use of floor space  
No workpiece damage  
Improved labour conditions  
Lift magnet programme  
Permanent and electro-permanent lift magnets standard up to 5000kg capacity for flat material  
Battery lift magnets up to 5000kg capacity for flat and 2200kg for round material  
Electro (mains powered) lifting magnets for plate, rounds, structurals and bundles

**Features:** Magnet provided with lifting arm for turning workpieces through 90°

**Safety factor:** 4:1

Part code	Code	Height mm	minimum thickness mm	Length x Width mm	Tested break away force kN	Workpiece width mm	Weight kg
